

Restaurant Solutions

"McCormick & Schmick's is a privately-owned company which operates a variety of full service restaurants which feature fresh seafood. In 1995 our corporate office needed a more robust accounting system to manage the financial and accounting needs of 14 restaurants in 4 states.

That's when we turned to InterDyn and Microsoft Dynamics GP. They were able to guide us through the process of completely changing out our accounting and reporting systems in a timely and cost effective manner. For the first time, we were able to run consolidated financial statements and actual-to-budget comparisons at the push of a few buttons. They were also able to facilitate our transition with the right resources to easily modify standard reports into more meaningful custom reports. We have continued to use InterDyn and Microsoft Dynamics GP in our managed growth and now have 35 restaurants in 17 states. We look forward to ongoing and future relations with InterDyn and Microsoft Dynamics GP in the years to come."

Driving Efficiencies and Reducing Costs to Allow Managers to Manage the Restaurant, not Technology

Restaurants are constantly under pressure to meet their numbers and remain competitive. It's getting even more difficult during these times when consumers want the most for their dollar, and we can only expect this to continue.

As a result, more restaurants are focusing on becoming as operationally and financially efficient as possible. To do so, your organization must find ways to better optimize your existing resources. Data integration and labor efficiency are initiatives that enhance your ability to be flexible and agile in responding to these economic changes.

InterDyn professionals understand the unique needs of the restaurant industry, and offer leading technology solutions that address these needs. Our offerings enable you to meet and beat the challenges you face today...and tomorrow. Within the industry, InterDyn serves companies like McCormick & Schmick's and Figaro's Italian Pizza with integrated solutions that result in enhanced efficiencies, reduce costs by eliminating manual data-entry, and provide critical, decision-driving information when needed. By eliminating manual inefficiencies and better optimizing your available resources, our solution provides the following key business benefits:

- Supplies real-time sales, cash flow, and other financial information upon demand
- Reduces fixed and variable costs through the elimination of manual data entry and operational inefficiencies
- Provides critical, decision-driving information when needed, due to flexible enterprise reporting capabilities and multi-unit Functionality
- Automatically updates payroll and bank reconciliation Information
- Affords quick and effective communication with all units, via Internet Business Portal
